### Select the information you Need from Leads

☐  Basic Info               ☐  Experience               ☐  CV
☐   Education               ☐  Additional file

**Save**   **Close**

Promoter field: it's an input field. In this field only user Email id can be given. By this user Email id, we will identify who is the promoter. User Email id not necessarily have to come from same business id. Any user Email id can be given. Note that when you put email id you need to show user name and have to select the name to get data. You will not find user name if email id already not been registered with Unipuler. When you drop lead data in contact table, you need to add column to keep promoter id. Reason, we will give promoter commissions on sales to their leads. Do not show any user name if email does not match exactly.
